## China New Cases Timeline

From January to April, the Chinese government implemented a **"Zero Covid"** policy, and the results:

**Number of additional cases decreased drastically.**

The "Zero Covid" include:

1. Lockdowns
2. Quarantine for travelers
3. Contact tracing, quarantine, and isolation
4. Routine testing of key populations

--------------------------	--	--	-----------------------------------	---------------	------------------------	------------

### **So, here are my suggestions:**

1. The government should start implementing stricter protocols such as implementing a lockdown, traveler quarantine, and so on, especially in Texas
2. People are encouraged to constantly wear masks and avoid crowds.
3. Increase monitoring, especially towards the end of the year.
4. Despite the fact that the number of deaths is lower than the number of confirmed cases, the public should be warns to be aware.
